Selling silence

## Installation instruction - Light floor screen

Start by assembling the base. It consists of four parts that are screwed together. Two arches and two pieces of flat iron.

These should be screwed together using the supplied screws. the underside of the flat iron is recessed.

Arcs go from one flat bar to the other as shown below.

When the foot is mounted so it is just to set the screen.

Should several displays assembled so used ZilenZio's straight or angled fittings plexiglass.

These are placed on top of the screens and then screwed with the screws. Although these have a recessed side.
